

Protect your glass kitchen surfaces with ClearShield Anti-Microbial Glass™!

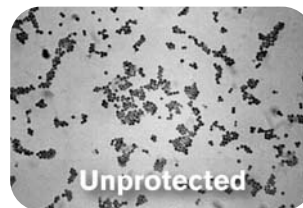

Ordinary, unprotected kitchen surfaces are less hygienic than you think!

 ClearShield®

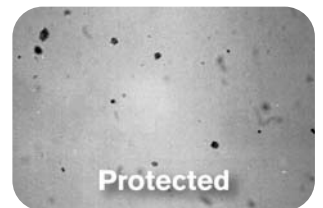

- easy-clean
- hygienic
- durable

Independently proven to resist adherence and growth of bacteria plus meets EU and US FDA direct food contact requirements

In independent laboratory tests, award-winning ClearShield® – the power behind ClearShield Anti-Microbial Glass® – was found to resist the adhesion of bacteria, proving it is more hygienic than ordinary, unprotected glass surfaces.

Unprotected

Protected

Glass kitchen surfaces can be upgraded to **ClearShield Anti-Microbial Glass™** for long-lasting 'non-stick' easy-clean performance.

Not only does this mean they will always be easier to clean and keep clean, saving time and effort (50% on average), it also has anti-microbial properties too. This is because **ClearShield Anti-Microbial Glass™** has an invisible barrier that resists the growth of bacteria and other micro-organisms, making your kitchen a safer and cleaner environment.
